

Spectrum Pediatrics

SENSORY PROCESSING EXPLAINED

ASHLEY GLASSER, MS, OTR/L

TUESDAY, FEBRUARY 11, 2014

6:30-8:30 PM

How do our senses help us learn? What implications do sensory issues have for interacting successfully with those around us and our environment? Please join us for an informative night with Spectrum Pediatrics' occupational therapist, Ashley Glasser, MS, OTR/L, as she provides information on the basics of Sensory Integration and what happens when Sensory Integration is not successful, also known as Sensory Processing Disorder. She will also provide more in-depth information regarding sensory modulation disorders (a subtype of Sensory Processing Disorder), including over-responding, under-responding, and sensory seeking behaviors. Sensory diets will be defined, and examples of activities for the diet will be shared. A question-and-answer period will also be included in the workshop to target each parent's questions regarding their own child's needs. We are excited to see you for our first Parent Workshop in 2014!!

THIS EVENT IS FREE!!

Location of Event:
Spectrum Pediatrics
2869 Duke St.
Alexandria, VA 22314

CALL OR EMAIL BY FEBRUARY 7, 2014 TO REGISTER... SPACE IS LIMITED.

ASHLEY GLASSER: Ashley is an Occupational Therapist who received her B.A. degree in Psychology from the University of North Carolina at Chapel Hill and her M.S. degree in Occupational Therapy from Tufts University. Ashley's interest in helping children with disabilities, developmental delays, and various special needs began during her undergraduate education while working in a group home for young boys diagnosed with autism. Prior to graduate school, Ashley worked for three years as a special education teacher in a K-5 classroom for children with moderate to profound developmental disabilities.
